

CORPORATE PORTFOLIO 2026

Enterprise hosting, communications, and control systems built as one ecosystem.

MigraHosting, operated by MigraTeck LLC, combines Cloud Pod hosting, control-plane automation, business email, cloud PBX, secure storage, and AI-assisted operations into a single commercial platform.

INVESTMENT THESIS

The commercial value is not just hosting. The platform packages infrastructure, control, communications, and support into one accountable operating model that is easier to sell, support, and expand.

EXECUTIVE BRIEF

One commercial face backed by one operational backbone.

Commercial Face

MigraHosting sells the platform through clear bundles, services, and support promises.

Operational Backbone

MigaPanel, MigraPanel, and service agents turn those promises into governed delivery.

MigraHosting

MigaPanel

Cloud Pods, migrations, SSL, backups, domains

Internal operations, lifecycle workflows, customer governance

MigraMail

Business email, routing, compliance, domain-aware management

MigraVoice

Cloud PBX, browser softphone, IVR, queue and analytics

COMPANY OVERVIEW

MigraHosting is the commercial face of a broader delivery stack.

Corporate entity

MigraTeck LLC

Market posture

Integrated platform, not commodity hosting

Commercial motion

One dashboard, one bill, one operations team

Who we are

MigraHosting is a modern hosting platform powered by MigraTeck LLC, a Florida Limited Liability Company based in Tamarac, Florida. The company positioning in the live site and product code is consistent: fix the frustrating parts of hosting with transparent pricing, real support, and infrastructure that customers can actually trust.

- MigraTeck LLC, 5423 N State Road 7, Tamarac, FL 33319
- Commercial support line: 877-545-5428
- Primary commercial channels: sales@migrahosting.com, support@migrahosting.com
- Operating model: managed infrastructure with proprietary control-plane tooling

What we sell

MigraHosting is not positioned as basic shared hosting. It is sold as an all-in-one business platform that replaces a fragmented vendor stack with one dashboard, one bill, and one operations team.

Cloud Pods

Domains

MigraMail

MigraVoice

Premium SSL

MigraPanel

Migration Services

Why it wins

Consolidation, accountability, and integrated support beat fragmented point-solution stacks.

Leadership

The live commercial site identifies MigraHosting as owned and operated by MigraTeck LLC, led by founder Bonex Petit-Frere.

Team model

Site copy frames the team around leadership and strategy, infrastructure and automation, and support and onboarding rather than anonymous outsourced support tiers.

Commercial proof

The sales story stays consistent across the live site, bundle positioning, and platform routes: prospects buy a managed operating model, not just disk space and bandwidth.

"Stop juggling five different providers. MigraHosting consolidates everything into one platform, one dashboard, one bill."

Commercial positioning from the live features experience

Built for serious projects, not oversold shared hosting.

01

Cloud Pod isolation

Every site runs inside an isolated LXC container with dedicated CPU, RAM, and NVMe storage. The promise is explicit: no noisy neighbors and no resource stealing.

02

Integrated business services

Hosting includes built-in email, business phone, backup, observability, and security services rather than pushing customers into disconnected add-ons.

03

Operator-grade control plane

MigaPanel, MigraPanel SaaS, infrastructure scripts, and service agents connect the commercial surface to real operational workflows across web, mail, SSL, pods, and support systems.

NVMe + HTTP/3

MigraEngine, Brotli, Redis, global CDN

30-day backups

S3-compatible off-site storage and one-click restore

Zero-downtime migration

Files, databases, email, DNS, and SSL handled end-to-end

Commercial products ride on a single operational backbone.

Commercial Layer

- MigraHosting
- MigraMail
- MigraVoice
- MigraDrive
- MigraMarket
- MigraPilot

Control Plane

- MigraPanel internal control surface
- MigraPanel public SaaS dashboard and portal
- Panel API and service agents
- Tenant, billing, DNS, file, and SSL routing

- Observability, automation, and support workflows

Infrastructure Layer

- Proxmox virtualization
- LXC Cloud Pods
- NGINX reverse proxy
- Mail core, DNS, DB, storage, and VoIP nodes

Business outcome

Customers see a unified service. Operations teams get composable internal services with explicit ownership boundaries.

Technical outcome

Front-end sales claims map to real platform capabilities already reflected in the repo, scripts, and infrastructure notes.

Cloud Pods are the flagship offer.

Performance

- NVMe SSD RAID-10 storage
- HTTP/3 and QUIC by default
- Redis 7 object caching
- PHP 8.3 OPcache and JIT
- Global CDN edge delivery

Developer experience

- Git push-to-deploy with auto-build
- Unlimited staging environments
- SSH and SFTP access
- WP-CLI, Composer, Node.js, Python
- Instant rollback and cloning

Security and reliability

- OWASP-oriented WAF coverage
- Automatic SSL/TLS with HSTS posture
- MigraGuard scanning and hardening
- DDoS mitigation at edge and origin
- Incremental daily backups with 30-day retention

Commercial plan data in the codebase spans entry to business tiers, plus student and managed WordPress variants. The shared message is consistent: isolated infrastructure at accessible pricing without renewal shock.

MigaPanel and MigraPanel make the platform sellable, operable, and supportable.

MIGAPANEL INTERNAL OPS

Internal operator tooling and public SaaS workflows stay separated in naming, but they run on one coordinated control-plane backbone.

Control surfaces

internal + public

MigaPanel

Provisioning, service lifecycle, domain ownership, and support context in one governed stack.

Integrated services

Files API tenant-scoped access

SSL API issuance + renewal

Mail routing domain-aware controls

Billing subscription state

Operator instrumentation

Health real-time service state, retries, and background agent visibility

Audit structured events, denial telemetry, and mutation accountability

Revenue commercial promises tied directly to operational readiness and support context

Live surface evidence

current public and operator routes

MigaPanel client login

`control.migrahosting.com/client/login` `migrapanel.com`

Secure client portal for pods, domains, billing, and Guardian conversations.

MigraPanel control center

Public commercial SaaS surface presented as the enterprise control center.

Integrated service rails

`files`, `ssl`, `billing`, `mail`

Operational APIs and agents stay tied to the same control-plane governance model.

No approved production screenshots are bundled in this repo yet, so this page uses a live-surface composite tied to real routes and current control-plane behavior.

MigraMail extends hosting into business communications.

MigraMail positioning

MigraMail is presented as serious email for serious projects: custom domain mailboxes, webmail, IMAP/POP3/SMTP, ActiveSync, spam and malware filtering, DKIM/SPF/DMARC automation, and central domain-aware management through MigaPanel and MigraPanel.

- 10 GB, 25 GB, and 50 GB mailbox tiers in live pricing data
- Standard-protocol delivery to avoid vendor lock-in
- Webmail plus admin and routing controls
- Competitive positioning against Google Workspace, Microsoft 365, and Zoho

Official MigraMail mark used for the live communications product.

Domains

Mailboxes

Routing

Compliance

Control center

Domain status, mailboxes, aliases, routing, and autoresponders.

Business value

Dedicated email service integrated with hosting, DNS, billing, and support.

Customer story

Professional email becomes part of the platform sale instead of an external upsell.

Operational story

dns-mail-core, DNS automation, and support tooling stay inside the same governance boundary.

Mailbox sign-in

migramail.com

Live branded mailbox login with password resets routed back through MigraPanel email management.

Management handoff

control.migrahosting.com/client/email

Customer-facing reset and management path remains anchored to the internal control plane.

COMMUNICATIONS STACK

MigraVoice turns hosting accounts into business-ready operations.

Official communications mark used for the cloud PBX product.

MigraVoice cloud PBX

Live feature copy positions MigraVoice as enterprise VoIP integrated directly into the hosting account experience, with local and toll-free numbers, call routing, IVR, voicemail-to-email, softphone access, and analytics.

Feature set

Numbers

Routing

Clients

Insights

- Auto-attendant IVR and ring groups
- Call queues and routing logic
- Voicemail-to-email and recording
- Web-based softphone experience
- SLA-oriented monitoring hooks

Commercial surface

migravoice.com

Public voice product page with enterprise positioning, plans, and bundle story.

Softphone route

call.migrahosting.com

Browser-based calling path used in public MigraVoice navigation.

Portal routes

[/portal](#) and [/portal/tenants](#)

Admin and tenant-facing voice access presented as part of the live product surface.

Why it matters commercially

For small businesses and multi-site operators, MigraVoice changes MigraHosting from a hosting vendor into an infrastructure partner that covers digital presence and customer communication.

PRODUCT EXPANSION

The platform extends beyond hosting into storage, marketing, and AI operations.

MigraDrive

S3-compatible storage with CDN distribution, versioning, encryption, and backup integration.

Approved official mark not yet bundled in this portfolio package.

MigraMarket

Enterprise marketing workflows for campaigns, automation, and communication delivery.

MigraPilot

AI-assisted operations interfaces for admin workflows, approvals, and guided execution.

Professional Services

Migrations, onboarding, custom deployments, and control-plane-assisted support engagements.

Commercial packaging supported by the same operations stack.

MigraMail

MigraVoice

MigraMarket

MigraPilot

Land

Cloud Pods, migration, domains, SSL

Expand

Email, PBX, storage, security, automation

Retain

Single dashboard, single vendor, higher account stickiness

Modern components, battle-tested choices.

Web

React, Next.js, GraphQL

Runtime

Node.js, NestJS, Python, GCP

Data

Marathon, Redis, PostgreSQL, Redis

Storage

NVMe RAID-10, S3-compatible backup targets

Compute

Proxmox, VMs, isolated LXC pods

Security

MigraGuard, WAF, TLS automation, DNSSEC

Monitoring

Metrics, logs, uptime checks, alerts

Ops

Panel API, service agents, deployment scripts

These technologies are not marketing filler. They appear directly in live site copy, repository code, infrastructure notes, and current operator tooling.

Security is designed into the commercial promise.

Security controls

- Container isolation with cgroups v2
- WAF protection for OWASP-oriented threats
- Automatic SSL and certificate management
- DNSSEC for managed domains
- Malware scanning and removal

Reliability controls

- Daily backups with 30-day retention
- One-click full or partial restore
- Pre-deploy snapshots before updates
- Health checks every 30 seconds
- Multi-layer observability and alerting

Commercial implication

MigraHosting sells confidence, not just compute. The deck should make clear that uptime, resilience, and incident readiness are product features that support pricing power.

Migrate in minutes, not days.

01

We copy everything

Files, databases, emails, DNS records, and SSL certificates.

02

We test thoroughly

Full QA in staging before anything customer-facing is switched live.

03

We flip the switch

DNS updated, SSL issued, caches warmed, and production cutover handled.

The migration narrative appears repeatedly in the commercial site and matches the operational reality of the current infrastructure scripts and runbooks inside the repository.

PROOF AND ADOPTION

Trusted by real businesses already represented in the ecosystem.

Elize Foundation

Nonprofit

Holistic Group LLC

Wellness and training

Lituation DJs

Entertainment

Premier Tint Services

Local services

Why this matters

These are not invented logos for a sales deck. They are real customer references already surfaced in live site code, provisioning notes, and operational documentation.

Market signal

The customer mix spans nonprofit, local business, wellness, and entertainment. That diversity is useful proof that the platform can serve both straightforward and more customized accounts.

Why customers switch.

CATEGORY

MIGRAHOSTING

TYPICAL HOST STACK

Isolation

Dedicated Cloud Pod resources

Oversold shared environments

Product breadth

Hosting, email, voice, storage, panel

Multiple vendors and dashboards

Renewal posture

Transparent pricing narrative

Promotional teaser pricing

Support

24/7 engineers and phone access

Generic tier-one escalation loops

Migration

Handled end-to-end by Migra team

Customer-managed or partially assisted

The commercial story should keep returning to a simple message: better architecture, clearer support, and more integrated services than commodity hosting vendors.

How MigraTeck engages.

Standard platform plans

Commercial self-serve and assisted sales motions for hosting, email, and add-on services.

Managed onboarding

White-glove migration, DNS alignment, SSL rollout, mailbox setup, and production cutover.

Custom enterprise work

Multi-service packaging, dedicated support paths, infrastructure tuning, and custom workflows.

Leadership and strategy

Founder-led positioning, product direction, and commercial accountability

Infrastructure and automation

Server operations, DNS, backups, panel services, and deployment automation

Support and onboarding

Human-first onboarding and support for buyers who do not want to self-manage complexity

Ideal buyers

Local businesses, agencies, nonprofits, operators who need reliability, and organizations tired of paying separate vendors for hosting, email, voice, and support.

NEXT STEP

Bring infrastructure, communications, and support under one roof.

MigraHosting is positioned to win when a prospect is tired of fragmented tooling and wants an accountable platform partner. This deck can serve as the base for sales meetings, partnership conversations, and a print-ready company capability booklet.

PLATFORM PARTNER**ONE DASHBOARD****ONE OPERATIONS TEAM****RECOMMENDED USE**

Use this deck to anchor executive sales conversations, partner introductions, and capability reviews where reliability, consolidation, and accountable support matter more than commodity pricing.
